Subject: Applications from Reckitt
Date: 08/06/2009 05:24 PM

Scott - I just wanted to let you know that we have two new rodenticide applications from Reckitt. They are both bromethalin, preloaded bait stations for OTC sale. They are claiming Tier III (child resistant). These are the first products we've seen other than Tier IV stations. They are on a 6 month PRIA review timeframe, but I think we could get them out in a month or less. The only new data to review is the CRP study. Let me know if you have any questions.

Regards,
John
